1

DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Omum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-11 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 17-28 of U.S. Patent No. 6,362,439 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other. In claim 1 of the present application, the "first and second frames movable relative to each other" of claim 17 of the U.S. patent are not mentioned but are implied since the load cell claimed must be mounted to something in order to be operative as clearly indicated by the application's own specification (there is apparently no embodiment disclosed in the application that does NOT have the load cell mounted between two frames of a bed). The "cell block" of claim 1 corresponds to the "load-cell body" of claim 17. The "mount" of claim 1 corresponds to the "receiver body" of claim 17; and, the "liner" of claim 1 corresponds to the "stud receiver" of claim 17.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2841

Claims 1-11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Welvaarts (EP

0744598 A1). Welvaarts discloses a load cell block (2) that has an end part (IE: "stud") which is inserted

into a mount (8) which has an internal liner (10). Exactly whether the relative term "more lubrous" is

actually limiting in a patentable sense is debatable, but nonetheless, the examiner notes that plastic

material would appear to have a lower coefficient of friction than ceramic or steel depending on the type

of surface treatment or finish applied to the load cell block.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should

be directed to Randy W. Gibson whose telephone number is (703) 308-1765. The examiner can normally

be reached on Mon-Fri., 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

David S Martin can be reached on (703) 308-3121. The fax phone numbers for the organization where

this application or proceeding is assigned are (703) 308-7722 for regular communications and (703) 308-

7722 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be

directed to the receptionist whose telephone number is (703) 308-5115.
